ECONOMY AS BUILDING BLOCK OF SHARED SOCIETIES AND VALUES

Current complex situation in Bosnia and Herzegovina has a huge consequences on economy of the country. Namely, economic growth is rather low and shows no sign of constant and stable increasing. The unemployment rate is high and percentage of youth unemployment is the highest in Europe. The percentage of active population is among the lowest in the region. Level of foreign direct investments is low and business climate is not stimulating one.

As result of comprehensive approach, the EU has developed South East Europe 2020 Strategy (SEE 2020). The strategy tackles seven countries in the region: Albania, Bosnia and Herzegovina, Croatia, Kosovo, FYR Macedonia, Montenegro and Serbia. The Strategy is designed to enhance growth in all SEE countries with special reflection to improving countries' competitiveness and aligning with EU standards (integrated growth pillar), promotion of innovation and the knowledge-based economy (smart

growth pillar), actions that will ensure robust and self sustainable growth (sustainable growth pillar), employment opportunities, reduction of poverty and social inclusion (inclusive growth pillar) and increase in efficiency of public sector as prerequisite of efficiency of economy (governance for growth pillar).

The targets for 2020 that are set are very precise and measurable, as well as actions that should be undertaken to achieve the targets.

Compact for Growth and jobs as a part of New EU initiative for BiH is opening a new challenges and opportunities which affects all involved stakeholders.

QUESTIONS TO ADDRESS

1. Why shared society and values have economic rationality and how to promote that?
2. What is the role of government in supporting economy and entrepreneurship as tool for stability, security, prosperity and shared society and values?
3. What is the role of business community and their rational in promotion and building shared society and values
4. The unemployment in B&H, region and some EU countries is currently important issue tackling overall economy. The unemployment rate is huge, specially, unemployment rate of youth. How is possible to promote the shared societies concept in time when people are engaged in vital living problems? How Compact for
5. Regarding regional perspective, which economic challenge would you describe as the most difficult one to address in the countries? What would be the most important to solve in the region?
6. South East Europe 2020 Strategy is document with special emphasis on countries' competitiveness and on aligning with EU standards. In a terms of current B&H situation, how would you assess the perspective of the country: in terms of enhancing competitiveness and in terms of possibilities to align with EU standards?
7. It is possible to notice many divisions all over the Europe. Divisions of economic nature (among others) are visible, not only among the countries, but

within the countries as well. At the same time, economy is important element in implementing shared societies concept. In that context, mentioned divisions are huge challenge that the Europe is currently facing. How is possible to overcome it? How that reflects to B&H, region and shared society and values in particular?
